

OBJECTIVES

Web Developer with strong expertise in HTML5, CSS3, Bootstrap, JavaScript, and Python. Passionate about building responsive, user-centric web applications and delivering clean, optimized code. Seeking a challenging software development role to contribute technical skills, improve product performance.

EDUCATION

Bharathiyar University | Master of Computer Science | **2023-2025**

Kamaraj University | Bachelor of Computer Science | **2020-2023**

SKILLS

Languages : Python, HTML5, CSS3, JavaScript

Frameworks : Bootstrap, Tailwind.

Technical Concepts : Responsive Web Design & Mobile-First Development, DOM Manipulation & Event Handling (JavaScript), AWS Servers (Handling), AWS re/start.

Soft Skills : Communication, Teamwork & Collaboration, Attention to Detail, Time Management.

Tools : GitHub, VS Code, Antigravity, Notepad ++ , Putty, WINSCP.

WORK EXPERIENCE

Web Developer Intern

Macronment Technology Solutions Pvt. Ltd., Salem | Jan 2025

- Built responsive and visually appealing web pages using HTML5, CSS3, and JavaScript.
- Supported back-end development in Python and SQL.
- Collaborated with cross-functional teams in an Agile environment to deliver product features on time.
- Conducted debugging and code optimization to enhance speed and maintainability.

PROJECTS

Hotel Management System | Aug 2024 – Dec 2024

Technologies: HTML5, CSS3, Bootstrap, JavaScript (local storage)

- Developed a responsive hotel booking system using HTML, CSS, and Bootstrap, ensuring a seamless experience on desktop and mobile devices.
- Implemented dynamic user input forms for booking details (guest info, room type, check-in/out dates) and stored all data in browser Local Storage for quick retrieval without a backend.
- Created interactive UI features such as form validation, booking confirmation alerts, and dynamic tables to display and manage reservations efficiently.
- Optimized code for maintainability and reusability using modular JavaScript functions, improving performance and allowing easy updates to the booking system.

Expense Tracker App | Mar 2025 – Apr 2025

Technologies: Python, Tkinter, CSV / local storage

- Developed a desktop expense tracker application using Python and the Tkinter library, enabling users to record, categorize, and manage their daily expenses efficiently.
- Implemented an interactive GUI for easy input of expenses, including fields for Date, Category, Amount, and Description, ensuring a smooth user experience.
- Integrated local storage (CSV files) to save and retrieve user data, allowing persistent tracking of expenses without a database.
- Automated expense categorization and reporting, generating summaries for monthly spending, and helping users analyze and manage finances effectively.
